

Summit Project Plan

Project Title

All-Aboard, Common Assessment Policies at ISHS/MS

District/ Organization

School District of Iola-Scandinavia

Project Description

The goal of this project is to create a framework to guide staff collaboration to identify and develop consistent, research-based practices aligned to teachers' best-practice beliefs around assessment policies. The outcome of the framework will support all levels of student learning. Students have a right to consistent and clear guidelines for assessment and grading; the framework will empower staff to achieve this goal.

Improving the assessment experience for students will also improve communication with parents. Consistent assessment practices throughout our building will improve parent understanding the school's approach to student learning. The group will include teachers from the upper elementary level classes in the development and implementation of the plan to expand the consistency of assessment practices and better support students as they transition into the middle school building. The framework will also include input from students and other stakeholders. The success of the framework will be most evident if teachers, students, parents, school board members, and the community are aware of the framework revision.
